The U.S. Fire Administration announces the Fire Marshal Interchange.

Fire Marshal Interchange
Connecting. Communicating. Collaborating.

The Fire Marshal Interchange (FMI) is a secure information platform that allows fire marshals from across the United States to share knowledge and information outside jurisdictions. By sharing information on the FMI with others in your profession, you will help bring awareness to — and learn about — problems and trends that threaten the lives of those we have sworn to protect from fire and life safety issues.

The world of the fire marshal is ever changing. The FMI provides you with a resource to collaborate with other like-minded professionals to discuss basic and oftentimes complex situations that arise. Interactions here can allow for better mitigation planning when confronted with significant life safety concerns.

How to join the Fire Marshal Interchange

The FMI website resides on the Homeland Security Information Network (HSIN).

Registered (active) HSIN users, send your request to join the FMI to bruce.bouch@fema.dhs.gov.

New HSIN users:

1. Send a request to join the FMI from your assigned work-related government email account to bruce.bouch@fema.dhs.gov.
2. We will email you an invitation. Follow the instructions in the invitation.
3. After we vet you into the HSIN, we will notify you of your access to the FMI.

This site will allow like-minded professionals to share techniques used to mitigate various situations as they arise, thereby giving fire marshals an edge in securing better outcomes.

Connect. Communicate. Collaborate. Join your fire marshal colleagues on the FMI today!

The Fire Marshal Interchange-controlled access page provides:

➤ Home page

On this page you will find:

- ▶ A welcome section.
- ▶ Training and conference list calendar.
- ▶ The FMI program graphic created for the site.
- ▶ Site points of contact.
- ▶ Training and resource links.
- ▶ A menu on the left side to allow you to navigate through each page.

Please review and evaluate each portion of the home page. We are also in need of additional content to populate the list calendar, so feel free to add appropriate trainings and conferences. If you know of any resource links missed, please submit those links to bruce.bouch@fema.dhs.gov for review and placement on the links column.

➤ FMI contacts

Please click on the “add new item” and supply your detailed information as a new member of the site. Members will look here to find other members for ideas, tips and suggestions for various topics.

➤ Discussion boards

This is an open forum information exchange. Three headings were developed to encourage open discussions and dialogue.

- ▶ Request for Information — Seeking answers and consensus on various topics.
- ▶ For Your Information — Sharing of learned information.
- ▶ General Discussion — Free to discuss any and all topics concerning the profession.

➤ Reference libraries

We seek your thoughts and input, along with relevant content, for these six libraries designed with the intent to share documents.

- ▶ Administration — Memorandums of understanding, standard operating procedures, standard operating guidelines, etc.
- ▶ Code enforcement — Inspections, engineering, etc.
- ▶ Community risk reduction — Life safety efforts, active programs, etc.
- ▶ Explosive investigations — Trends, special attention items, etc.
- ▶ Fire investigations — Trends, special attention items, etc.
- ▶ Legislation — Senate and House bills, tactics used, etc.

➤ Multimedia

Used for pictures and video sharing.

- ▶ Photo library — Incidents and code violations.
- ▶ Video library — This can include the use of drones for evidence collection, along with other typical video materials.
